Art Unit: 2833

1. Claims 65-74 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The following limitations or features that are confusing and unclear: Claim 65, lines 3-4, it is unclear what part of the insulative body is referred as “a mating surface” “a second surface”; lines 7-8, the features “a heat dissipation opening...receiving cavity” are not understood; claims 66-71 features are unclear; claim 72, line 2, the features “a mating surface”, “a planar surface” and lines 9-18, the features “a first flexible beam...said contact receiving cavity” are not understood; claim 73 features and claim 74, lines 10-12, the features “wherein a substantial...an exterior contact surface” are confusing and unclear. Since all the features described above were not disclosed in the original specification, therefore, it is considered new matter. Applicant is required to cancel the new matter in the reply to this office action.

2. Without the features as described above the rejection stands as follows:

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

4. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 65-74 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis et al (843).

Art Unit: 2833

Insofar as the claims can be understood, the disclosure of Davis shows each and every element set forth in these claims. For example: Figs. 2, 4, 9, 11 an insulative housing 2 including an opening therein, a contact receiving cavity for receiving a contact 6 and a medial space between two spaced apart contact walls 9.

6. Applicant's arguments filed 10/09/03 have been fully considered but they are not persuasive. Applicant's remarks are considered to be fully addressed in the rejection of the claims above.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
